

WHEELCHAIRS & ACCESSORIES

MANUAL WHEELCHAIRS

There are different types of **manual wheelchairs** available, ranging from Economic, Standard, Heavy Weight / Bariatric wheelchairs with folding frames, to suit Hemiplegic patients, patients with CVA/ Strokes, Paraplegics, Quadriplegics and Frail patients.

More **Robust wheelchairs** for high activity patients, as well for those in the rural settings, are available – these may have a folding frame or a rigid frame to be used for paraplegics. During evaluation, the most suitable wheelchair option will be chosen to suit your personal activity.

MOTORIZED WHEELCHAIRS

Motorized wheelchairs are available from an economic level to more expensive, from a standard folding wheelchair with the batteries located beneath the seat of the wheelchair to lightweight folding wheelchairs with the batteries situated in the armrests. The joystick is placed on the side of the functional hand.

There are also **Rigid Frame Heavy Duty Motorized wheelchairs** to be used by Quadriplegic patients, especially in the rural areas where a more robust wheelchair is needed. These wheelchairs can be issued with tilt in space to assist with tilting the patient when needed. Extra headrest, trunk control belts and side panels can be added to assist the patient with trunk stability while seated in the wheelchair.

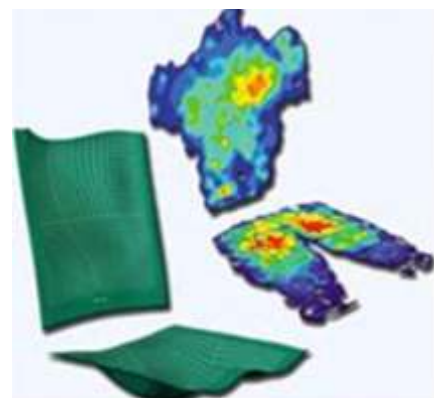

WHEELCHAIRS FOR CP CHILDREN

We assist our CP children with the correct wheelchairs. Each Child is assessed individually and the best solution chosen.

WHEELCHAIRS CUSHIONS

Specialized wheelchair cushions are needed for every patient using a wheelchair, to assist with pressure relief and to prevent pressure sores on the buttocks, sacrum and hips. Pressure mapping is done to determine the correct cushion for the patient.

WHEELCHAIRS CUSHIONS continued

Different types of cushions are available - from foam, air pockets, gel pockets and many more to suit individual needs.

The size of the cushion will be determined by the size of your wheelchair and is manufactured according to your specific measurements. Each cushion is issued with a cushion cover (waterproof / standard)
